YOUR FIGHTER for FL HOUSE Dist. 21

Donate NOW

**On Day 1, I'll make sure to stop all BS and nonsense, eliminate barriers, embrace innovation, and develop a bipartisan strategic plan/timeline so we can say we've fixed our chronic problems. Access to affordable tools and a safe environment will allow us not only to survive but to thrive, so that together we can build a better place for generations to come.**

*‡ I care about helping others. ‡*

*I recently retired as a doctor and professor in NeuroCritical Care at UF. My research has focused on stroke, TBI/PTSD, AD, PD, sickle cell anemia, sleep apnea, and personalized medicine, while exploring novel therapies ranging from genes to red wine and dark chocolate. I have raised millions in research funding, published 250 articles, and, most importantly, mentored countless students, fellows, and colleagues.*

*To better serve my UF/VA community, I was elected President of the Faculty Senate and served on the Board of Trustees. Through bipartisan teamwork, we delivered real results in police training, accountability, daycare expansion, and affordable facilities, etc.—work that inspired me to keep helping others because I CARE.*

*I run a small real estate business that has provided temporary shelter for people in need of a second chance.*

*WE deserve much better in these transformative times. That is why I commit to listen, fight for everyone and our community, tackle urgent problems, and deliver real solutions and cures that make us stronger, more united, prepared and more resilient for generations to come.*

♥ Follow your H. E. A. R. T: ♥

**HEALTHCARE:** Everyone shall have access to local top docs and specialists, public health programs, mental and physical wellness, all while maintaining a safe, supportive, and clean environment.

**EDUCATION & TRAINING:** Everyone deserves access to #1 public education and facilities, the greatest equalizer. I propose \$10-20/day daycare from 6 weeks to pre-K, which will ease the burden on working parents. Such investment will prevent school closures and raise reading and math scores by 10 points! With decent pay raises, daycare is an innovative way to recruit and retain top teachers, filling all vacant posts. By consulting with employers, colleges can (re-) train our workforce with the skills needed to embrace transformative challenges and secure well-paid jobs.

**ARTS+SCIENCE = STEAM:** Optimal brain development depends on creative spaces, leading to higher STEM grades. One way to benefit small businesses, attract people out of isolation, and build strong communities is to provide recurrent funding for arts and culture programs.

**RESEARCH & RIGOR:** Let's embrace innovation. Through strong oversight, guardrails, and accountability for elected officials, we can ensure our institutions and services work for all.

**TRANSPORTATION & HOUSING:** Renter/Owner/Builder-led plan and zoning reform should protect our farms and natural resources and increase affordable housing connected by reliable commutes. Stopping the hikes in energy, fertilizer, and home/car insurance will result in a resilient, safe, and prosperous environment.
